

Project Design Phase-II
Data Flow Diagram & User Stories

Date	01 November 2025
Team ID	NM2025TMID02948
Project Name	Calculating Family Expenses using ServiceNow
Maximum Marks	4 Marks

Data Flow Diagram :

This Data Flow Diagram illustrates how a user submits expense data (food, rent, education, utilities) through a ServiceNow Family Web Form. Submitted records are stored in the ServiceNow "Family Expenses" Table. The Calculation Engine processes raw expense data for monthly and category-wise summaries, checks for budget limits, and triggers alerts using the Report Generator and Notification System.

Example:

User stories

The following table outlines key user stories for the ServiceNow Family Expense Management system. These stories capture the main features from a user's and system's perspective, with acceptance criteria to ensure each requirement is met during development and testing.

User Type	Functional Requirement	User Story Story / Task	Priority Criteria	Release
User	Expense Subbission	As a family member, I want to submit expense details in various categories (food, rent, utilities, education aducation) so they can tracked.	High	Sprint 1
